SUMMARY

Computer Science undergraduate specializing in NLP/LLMs, Machine learning, and MLOps.. Passionate about building and deploying scalable ML systems, with practical knowledge of MLOps tools and end-to-end model development pipelines.[click here](#).

WORK EXPERIENCE

Ambassador - Z.ai

Dec 2025 - Feb 2026

- Represent Z.ai across online tech communities, promoting AI tools and real-world ML applications.
- Act as a liaison between the community and the core team, providing structured feedback to improve product reach and adoption.
- Facilitate knowledge-sharing around practical AI integration and emerging technologies.

Campus Partner - Perplexity

Sept 2025 - Nov 2025

- Drove 100+ verified sign-ups through strategic outreach, workshops, and peer engagement.
- Promoted AI-powered research workflows for coding, academics, and productivity.
- Strengthened platform visibility within technical and non-technical student communities.

PROJECTS

Network Security

[Link to Demo](#)

Designed and developed a production-grade MLOps pipeline that detects phishing websites by analyzing 30 URL-based features. The system automates the complete ML lifecycle — data ingestion from MongoDB, schema validation with data-drift detection, KNN-based feature transformation, and multi-model training with hyperparameter tuning and serves real-time predictions through a FastAPI REST API, with experiment tracking via MLflow/DagsHub and containerized deployment to AWS (ECR + EC2) through a GitHub Actions CI/CD pipeline.

Video Wiki

[Link to Demo](#)

VideoWiki is a state-of-the-art, high-density video knowledge engine. It automatically transcribes and compiles YouTube videos or local media files into gorgeous, flowing Wikipedia-style editorial articles. Built with a floated InfoBox layout and a collapsing AI Research Assistant sidebar, VideoWiki makes video catalogs completely searchable, queryable, and readable in seconds.

EDUCATION

2023 - present	Bachelor of Engineering VIT Bhopal University	(GPA: 8.78/10.0)
2022	Class 12th ISC Board	(83.4)
2020	Class 10th ICSE Board	(91.8)

SKILLS

Programming	Python, C++, SQL
Machine Learning	PyTorch, Transformers (HuggingFace), Scikit-learn, LoRA (PEFT), Embeddings
Agentic libraries	Langchain, Langgraph Prompt Engineering, Fine-tuning, Model Evaluation
Data	NumPy, Pandas, Data Preprocessing, Feature Engineering, JSON Handling
Tools	Git, GitHub, Google Colab (T4 GPU), Jupyter Notebook, VS Code, Linux
Concepts	NLP, Deep Learning, Supervised Learning, Evaluation Metrics, Model Optimization
