## EXPERIENCE

**Z.ai** Dec. 2025 – Feb. 2026  
*Ambassador* Remote

- Represented **Z.ai** within AI and developer communities, promoting AI-powered tools through social media, events, and peer engagement.
- Collected structured user feedback and communicated feature requests to the product team, helping improve user experience and community adoption.
- Created educational content and demonstrations showcasing practical AI and machine learning use cases, increasing awareness and encouraging product adoption.
- Engaged with students and developers by answering queries, onboarding new users, and fostering an active AI-focused community.

**Perplexity** Sept. 2025 – Nov. 2025  
*Campus Partner* Remote

- **Acquired 100+ verified users** through targeted outreach, workshops, and campus engagement initiatives.
- Championed adoption of AI-powered research tools by demonstrating real-world use cases for coding, research, and productivity.
- Collaborated with student communities to increase brand awareness and gather user insights that informed future outreach efforts.

## PROJECTS

### Network Security - Phishing Detection MLOps Pipeline 🔄

- Engineered an end-to-end phishing detection platform featuring automated data ingestion from MongoDB, validation, preprocessing, model training, and REST API inference using FastAPI.
- **Achieved 97.7% F1-score, 97.4% precision, and 98.1% recall** by benchmarking multiple classifiers with GridSearchCV hyperparameter optimization and MLflow experiment tracking.
- Designed a production-ready deployment pipeline using Docker, GitHub Actions, AWS ECR, and EC2 for automated CI/CD and scalable model serving.

### VideoWiki - AI-Powered Video Knowledge Engine 🔄

- Built an AI-powered video knowledge engine that converts YouTube videos and local media into structured Wikipedia-style articles using **Mistral LLM**, Faster-Whisper, and Flask.
- Designed a dual-layer **RAG architecture** with HydraDB vector storage, enabling both session-specific contextual chat and global semantic search across indexed video transcripts.
- Implemented real-time AI streaming, transcript ingestion, automatic article generation, and offline fallback mechanisms, delivering a production-ready research assistant with resilient retrieval and inference.

## EDUCATION

### VIT Bhopal University

*Bachelor of Technology in Computer Science and Engineering*

Bhopal, MP | CGPA: 8.78/10

- **Campus Involvement:** Core Member, Technical Team – Software Development Club; Member – AI Club.

### City Montessori School

*ISC Board (Class XII)*

Lucknow, UP | 83.4%

### City Montessori School

*ICSE Board (Class X)*

Lucknow, UP | 91.8%

## SKILLS

---

### Languages

Python, C++, SQL, JavaScript

### AI/ML

PyTorch, Transformers, Scikit-learn, Fine-tuning, RAG, LLMs

### Frameworks

FastAPI, Flask, LangChain, LangGraph

### Cloud & MLOps

Docker, MLflow, GitHub Actions, AWS (EC2, ECR, S3)

### Database & Tools

MongoDB, MySQL, Git, GitHub, Jupyter Notebook

## ACHIEVEMENTS

---

- Secured a **Top 10 Finalist** position in the **Cerebras × Cline Vibe Coder Hackathon**, competing against developers globally.
- Solved **150+** algorithmic problems on **LeetCode**, strengthening proficiency in Data Structures and Algorithms.

## CERTIFICATIONS

---

- **Supervised Machine Learning: Regression and Classification** – DeepLearning.AI & Stanford University (Andrew Ng), Coursera
- **The Bits and Bytes of Computer Networking** – Google Career Certificates, Coursera
